

**NEW**

# New Leader Edge NL4500G4 & L5000G5

- Stahly's 57mph road speed is more productive
  - Joe's garage can keep a truck in the field
  - Automatic conveyor tensioning 6-7 yr life
    - 26% better yields on outer 4-5 rows
    - Less repairs, expense & downtime w/Diagnostic system alerts
  - Front & rear grease banks
  - Flip-up hillside divider

**73" rear radials**

**54" front radials**

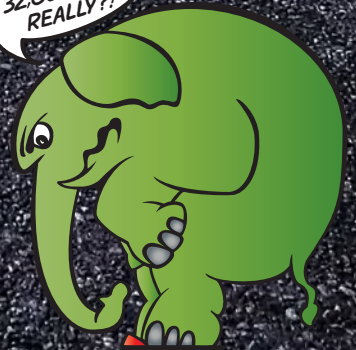

**Stahly Pete w/15' Edge weigh  
11,500 lbs less than a Deer Floater!**

Get in the field sooner! Less compaction, fuel, tire wear and better ride. 10,000+ parts outlets, no captive parts market.

**Dependable 40 Year Service Life!**

100+, 30-year+ old Stahly floaters are still in use every day.

32,800 LBS...  
REALLY?!

# PRE POST DRY COMBO

**30", 36" or 38" spacing**

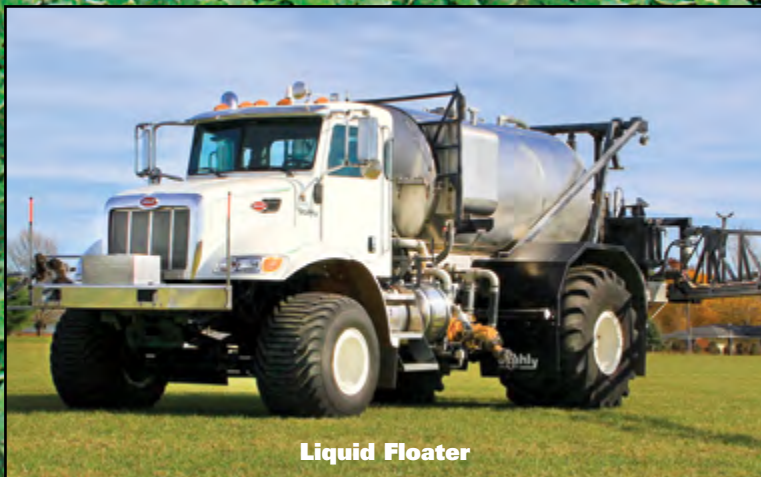

A Stahly Pre/Post/Dry Combo™ will cover more acres per day than high clearance applicators in three out of the four applications you do. You will get three times the life out of your expensive high clearance applicators when you use them for tall crops only or what they were designed for. Utilize a much more economical to own and operate Stahly Peterbilt for the other three seasons until post emerge crops reach 3' in height. You may find you do not really need the 1200 gallon model when you add up how many acres of tall crops you cover.

Go from overly complex machines with limited and expensive service options to proven simple truck based applicators which we or any local repair shop can diagnose and repair normally quicker than the ground up counterparts.

# It's not Rocket Science ...

...we're carrying a spreader box across a field!

**NEW LEADER**

## Stahly PETERBILT vs. GROUND UP UNITS

### Why is Stahly Pete w/New Leader Edge 4500G4 or G5 better than the big 3?

- 57mph road speed for more acres per day
- Less compaction • Lower life cycle cost
- 11,500# less weight • Costs far less to own & operate
- Better ride • Easier to troubleshoot & keep running
- Worth \$60,000 more at trade in time • 3x Longer service life

**NEW!** Twice the operating range - accurate patterns from 1,400 RPM to 2,200 RPM & 2-Cruise Control settings for spreading and turns.

30" TO 38" ROWS

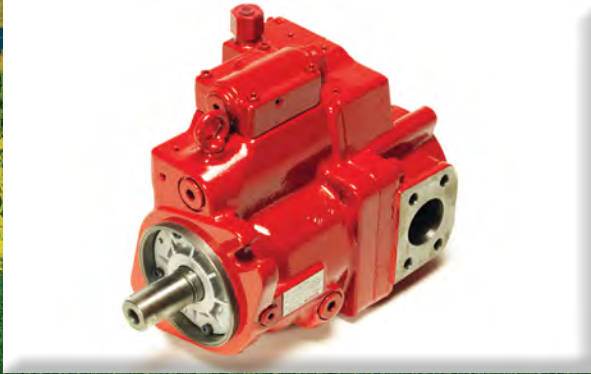

BEST VISIBILITY

# Setting the standard since 1976

## Pattern from 1,400 to 2,200 rpms

New variable displacement load sensing hydraulic system, provides constant GPM hydraulic flow for full, accurate patterns with twice the rpm range as before!

## Troubleshoot, Repair, Replace

So easy to access your kid sister can replace almost anything on the machine. For 40 years this has served our customers well! Often it's quicker to next day the part which is easily swapped out or we can send a service tech.

## Allison Shifter - optional

Conveniently located in the console for easy access. Mode-on starts in 3rd gear so no more pushing up or down arrow. Mode-off is for running on the road.

## Hydraulic Autosteer - optional

Raven Smartrax or Ag Leader Steer Command on a hydraulically steered 20,000# front axle.

## Excellent Visibility all Directions

Visibility out of a Stahly Pete is better than many ground up machines.

## Two Speed Planetary Rear Axle

Standard in the industry for Floaters, truck based or ground applicators.

# Spreader Technology Reaches a New High!

## Exclusive New Edge NL4500 features set dry application standards!

### PERFORMANCE

- Independent Spinner Speed & Monitoring • Boundary Spreading w/26% Better Yields on Boundary Rows
- Auto Chain Tensioning for 6-7 yr conveyor life • Feedgate Optimizer Program
- Fold-Away Hillside Divider • Front & Rear Grease Banks • 2 Year Full Warranty
- Factory Installed & Tested Electronic Components & Wiring
- Conveyor Operation Disabled When Spinners are Off

### HYDRAULICS

- New Leader Control Manifold • Hydraulic System & Conveyor Pressure Monitoring
- Hydraulic Oil Temperature and Oil Level Monitoring • Hydraulic Oil Filter Restriction Monitoring

### BODY

- Site Window • 304 Stainless Steel Cross-Tubes & SS Take-Up Bearing Brackets
- 304 SS Feedgate, 304 SS hydraulic lines Spinner Jacks & Handles • Self Centering Spinner & Material Divider
- 304 Stainless Steel Electronic Control Unit Enclosure

## What does this mean for me?

- 26% better yields on outer 4-5 rows • Twice the conveyor life as before
- Easier to calibrate, set-up and operate

# **Quick-Change Combo Units**

**Go from this ...**

**... to this in under an hour!**

Stahly's "Quick-Change-Combo" is a true combo – it can be switched fast and easy. Operators use one multi-purpose applicator year round, lowering cost per acre and maximizing investment. Save high clearance machines for what they're designed for. You probably don't need an overweight 1,200 gal hydrostat for the number of tall crops you spray, and you can cover more acres per day with a Stahly Pete than any "ground-up" unit or hydrostat. Many customers run 30,000 post acres before switching to high clearance machines, extending their service life or are downsizing to 1,000-800 gallon units.

# New Low Cost Applicators!

**Floaters in every configuration from \$200,000's to \$500,000**

From the most complex capable machines on the market, to affordable applicators all which operate at lower costs per acre. Stahly builds them all; Semi Float, Medium Float, Full Float and new "Super Float" in any size or capacity to fit your needs. Not everyone has the acres to support \$300 to \$400,000 machines, here are three popular, smaller, lower cost units.

# Consignment Sales

Stahly is the leader in truck based floaters ... our large following and contacts means more for your trade-in, or sell your truck-based applicators faster and for more money on consignment! Customers who are on the fence often have us sell their trade for "Top Dollar" prior to finalizing a deal on a new unit.

The big three and used dealers specialize in ground up rigs. Our expertise is truck based dry, liquid and air machines. We have a huge network of customers in every price range and style for pre-owned equipment across the country.

*Call us today ... the difference will surprise you!*

## Reconditioning

*Let us rehab your chassis, spreader, liquid or air machine including ground up machines!  
We check everything, inside and out, nobody does it better than Stahly.*
