

What Type of Applicators are the Most Profitable?

Our Stahly Pre/Post/Dry™ Combo has proven to be the right machine for the times including the upcoming potential Soybean Rust spraying. The trend toward more versatile and profitable equipment is in full force. Dealers recognize that they need equipment, which will pencil out in real world applications, not just on paper. With our "Quick-Change-Combo" one machine does the work of two or three stand-alone applicators.

Multi-Purpose Pre-Post-Dry™ Applicator

PRE-EMERGE

DRY

Setting the standard since 1976.

POST-EMERGE

TOP DRESS
32" Crop Clearance

Our rugged and dependable Stahly Peterbilt's are the most productive Liquid or Dry floaters money can buy. They operate at a much lower cost per acre than ground up units do and they cover more acres each day. When set up as a "Quick-Change-Combo" our 1800-gallon liquid systems swap over to a 13 or 14' New Leader G4 or a Multapplier in under an hour. Our Top Dress Peterbilt is set up with 72" front tires and 82" rear tires to spray in 30" rows or 36/38" rows with an industry leading 32" of crop clearance.

"The Best Applicators in the Business at Competitive Prices."
