

# DP.6 Plus DGPS-Ready

Single or Dual Product Control

**L3220G4 MultApplier**

Now available from New Leader. . .

*a complete controller/guidance/variable rate/spreader package!*

*The DP.6 Plus is standard equipment on the dual-hopper L3220G4 MultApplier, and can also control all other New Leader spreaders to provide built-in variable rate capabilities from one box.*

## DP.6 PLUS FEATURES:

- Controls one or two products with variable rate or straight rate application for single or dual bin spreaders.
- Removable 32 mb PCMCIA flashcard eliminates the need for an auxiliary PC. Reduces cost and in-cab clutter.
- As-applied mapping function records application rates for accurate record keeping and invoicing.
- Closed-loop spinner speed control locks in programmed spinner speed for greater control and an improved spread pattern.
- The large display features adjustable contrast and display smoothing for comfortable viewing. View four functions at one time for at-a-glance monitoring.
- Program up to 30 jobs for future reference.
- Built-in diagnostics simplify troubleshooting.
- Available with DGPS-5000 Receiver/Antenna and Lightbar Package. Auto swath width for lightbar runs through DP.6 Plus controller.
- Two-year full warranty.
- The DP.6 Plus retrofit kit adapts to any spreader with the Mark III, IV, IV.2 or V valves, or any other motorized valves (DICKEY-john, Raven and Mid-Tech). Provides a simple upgrade with all of the features and benefits listed above.
