

# SP.6 DGPS-Ready

## Single Product Control

*The SP.6 is standard equipment on the new L3020XP extreme performance lime/fertilizer spreader, and can also control all other New Leader single bin spreaders.*

*The SP.6 is variable rate-ready.*

### SP.6 FEATURES:

- Controls one product with variable rate or straight rate application.
- As-applied mapping function (via GIS computer) records application rates for accurate record keeping and invoicing.
- Optional closed-loop spinner speed control locks in programmed spinner speed for greater control and an improved spread pattern.
- The large display features adjustable contrast and display smoothing for comfortable viewing. View four functions at one time for at-a-glance monitoring.
- Program up to 30 jobs for future reference.
- Change the rate and density from the main screen.
- Optional in-cab spinner speed readout and control eliminates two-person manual adjustments.
- Built-in diagnostics simplify troubleshooting. In-field upgrades may be performed via computer.
- Available with optional DGPS-5000 Receiver/Antenna and Lightbar Package. Auto swath width for lightbar runs through SP.6 controller.
- Two-year full warranty.
- The SP.6 retrofit kit adapts to any spreader with the Mark IV.2 or V valves, or any other motorized valves (DICKEY-john, Raven and Mid-Tech). Provides a simple upgrade with all of the features and benefits listed above.
