

THREE MACHINES FOR the price of one.

Multi-Purpose Pre / Post / Dry™ Combo

Customers often tell us that they are tired of overly complex machines that are long on bells and whistles but short on profitability.

You will greatly improve your bottom line with a dependable Stahly Pre / Post / Dry™ applicator. Besides being a liquid and dry floater, they are the most productive post applicators on the market. When you cover 85% of your post acres with a Stahly Pre / Post, your needs for a hydrostat are reduced greatly, cutting down on repairs, trade cycles and even equipment size.

Your customers already know they are paying for a million dollars worth of specialized equipment, which sits idle most of the year. Maybe if you start using combo units, and take a more realistic approach to their needs, fewer of them will be buying their own applicators.
